## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 and 15-18 are, drawn to a gypsum board, classified in class 428, subclass 294.7.
  - II. Claim13-14, drawn to a process for manufacturing a gypsum board, classified in class 156, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case process as claimed can be used to make other and materially different product.

During a telephone conversation with Mr. E. D. Buff on May 12,2005 a provisional election was made with traverse to prosecute the invention of Group I, claim1-12,15-18.

Art Unit: 1773

Affirmation of this election must be made by applicant in replying to this Office action.

Claim 13-14 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-12, 15-18 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Applications No. 10/910183, 10/983,870 or 10/910113 in view of Fisher'607. The copending applications teach a gypsum board comprising a gypsum matrix, a first facer sheet, a second facer sheet one or more glass fibers placed within gypsum matrix and a coating formed over glass fibers. The

Art Unit: 1773

SN10/910183, 10/983870 or 10/910113 do not teach that silane may be used to coat glass fibers. However, the Fisher'607 patent teaches that silane is routinely added to a gypsum mixture. See column 2, lines 15-20. It would have been obvious to one having ordinary skill in the art at the time of invention to use silane in copending applications in the gypsum mixture or alone to coat glass fibers since such would improve hydrophobic properties of the gypsum board.

This is a provisional obviousness-type double patenting rejection.
